

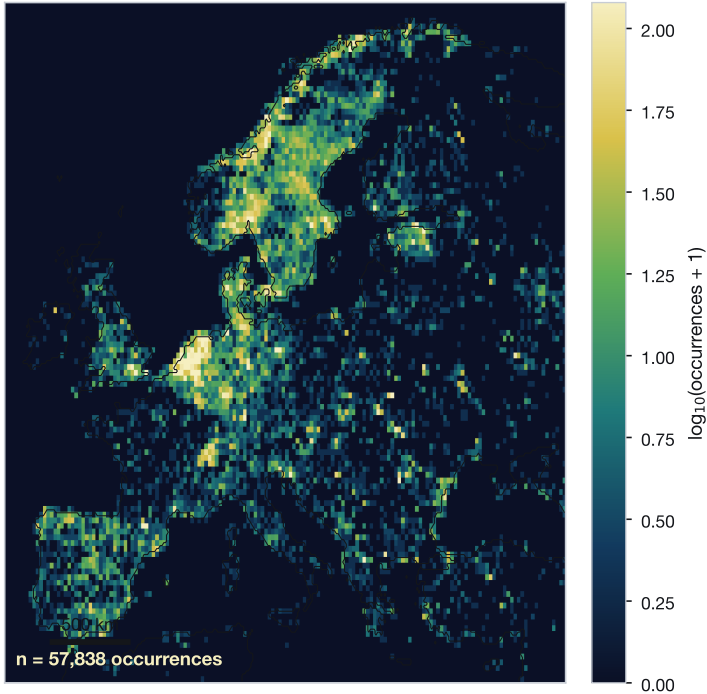

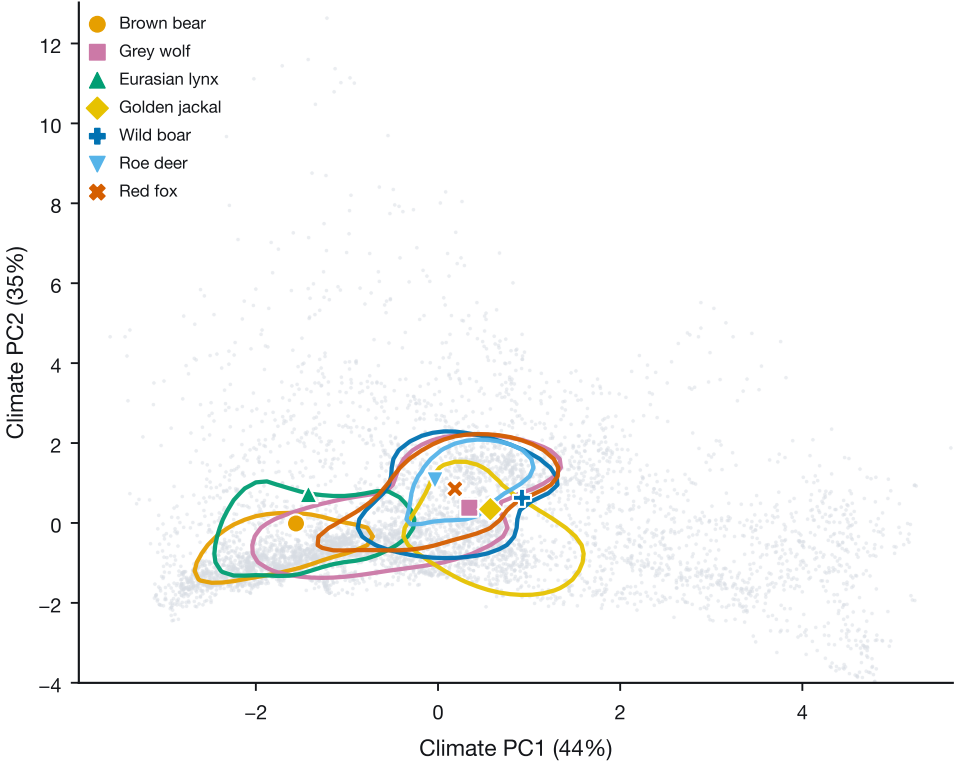

Figure 1 | A geometry-of-coexistence framework for European human–wildlife interaction

a Georeferenced records across 7 conflict-prone taxa

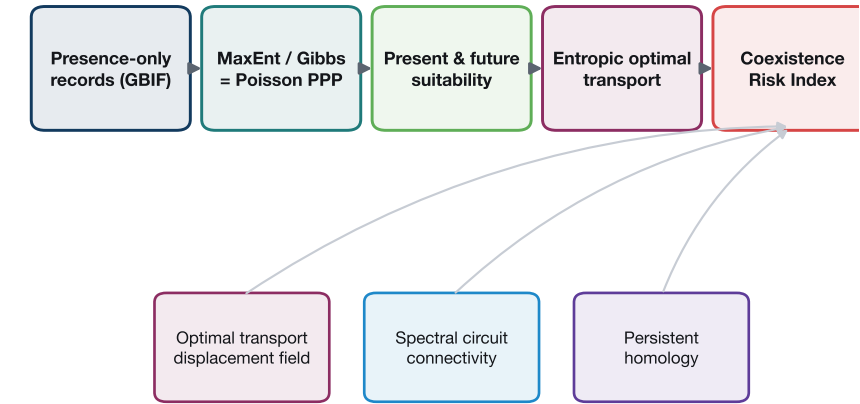

b Realized climatic niches (bioclim PCA)

c

A mechanistic, conflict-data-free pipeline

$$p(x) \propto e^{\beta \cdot f(x)} \Rightarrow \min_P \langle P, C \rangle - \varepsilon H(P) \Rightarrow F(x) = \langle T(x), \nabla H \rangle +$$

d Block-CV performance (mean $\pm$ SD, 4 folds)
