

Present vs 2090 species distributions — habitat suitability and its climate-forced retreat (SSP2-4.5)

Brown bear

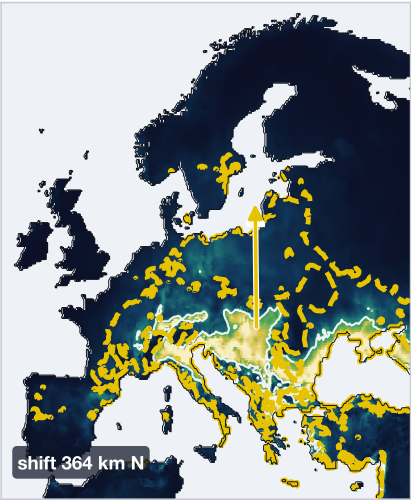

Grey wolf

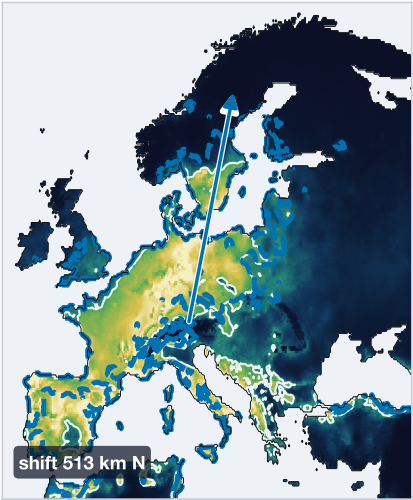

Eurasian lynx

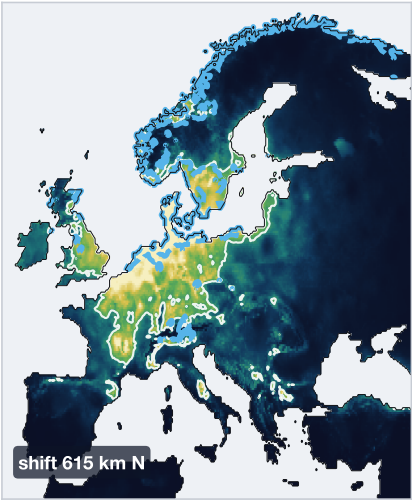

Golden jackal

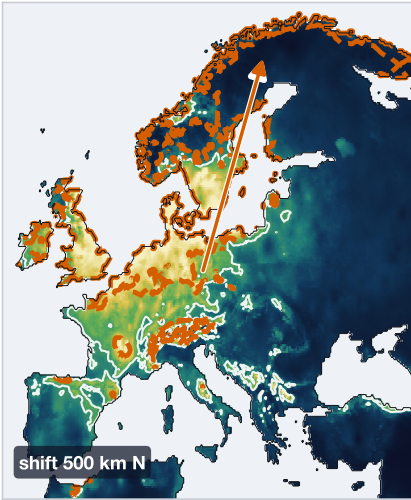

Wild boar

Roe deer

Red fox

How to read

- filled colour: present habitat suitability (per-species stretch)
- white outline: present core range
- dashed outline: 2090 core range (SSP2-4.5)
- arrow: mean poleward displacement

The gap between the bright core and the dashed line is the habitat the climate forces each species to vacate.
